

Fall

— PRODUCTION SALE —

**Friday, October 16, 2026 • 12:30 p.m.
at the Ranch, Morgan, TX**

Jeff Chaffin, Ranch Manager

Joe Walker & Joey Walker, Owners

Ranch Office: (254) 635-4444 | Ranch Fax: (254) 635-7201

P. O. Box 9 | Morgan, Texas 76671

www.w4ranch.com

WELCOME

Dear Friends and Cattlemen,

I would like to welcome each and every one of you to our Fall 2026 Sale. We are proud of this offering and believe it represents a deep, quality set of cattle backed by the genetics, performance and functionality needed to move your program forward. We take great pride in selecting and developing genetics that can make a meaningful difference in our customers' operations, and we believe this offering gives you that opportunity.

The bull offering is highlighted by four flush brothers out of CL 1 Domino 267K and the dam of Sherman 2157K, Churchill Lady 079H ET. Three of these brothers are polled, with one horned, and all four offer outstanding EPD profiles and tremendous genetic potential. Several additional Sherman 2157K sons sell, bringing even more consistency and proven genetics to the offering. Lot 9 is especially exciting—a full brother to last fall's high-selling bull and a natural calf out of 6120D. These are the kind of herd-building bulls that can have a lasting impact on a program.

The bred heifer offering is also a tremendous group. They are highly uniform, functional young females bred to some of our promising young herd sires. These heifers represent an opportunity to add quality, maternal strength and future productivity to your cow herd. Help yourself to these young ladies—they are the kind you can build around.

Once again, we will have lunch available on sale day beginning at 11:00 a.m., with the sale starting at 12:30 p.m. Central Time. The cattle are available for viewing anytime prior to the sale, and we welcome you to come take a look at them at the ranch. Please don't hesitate to call me if you have any questions about the cattle or the offering.

We would love to see you here at the ranch on October 16, 2026. If you are unable to attend in person, the sale will also be broadcast live on LiveAg.

Thank you for your interest in our program and for considering our cattle. We appreciate your business and look forward to seeing y'all on sale day!

Sincerely,

Jeff Chaffin, Manager
254/396-2785

We are proud to present our
2026 Fall Cattle for your evaluation!

FRIDAY, OCTOBER 16, 2026

12:30 p.m. CST ... at the ranch, Morgan, Texas

Sale Location

W4 Ranch-Steele Creek Headquarters, located on FM 927 between Lakeside Village and Morgan in Bosque County, Texas or 4 miles east of Morgan from Hwy. 174.

Accommodations

Hillsboro, Texas, 29 miles from the ranch

Sale Headquarters: Ramada Inn

(254) 582-3493 or (877) 200-3392

Other lodging at

Comfort Inn (254) 582-3338

Holiday Inn Express, (254) 582-0220

Also in Clifton, 20 miles from ranch

Best Western, (254) 675-8999

Air Travel

Dallas/Fort Worth Airport is serviced by most major airlines and is 90 miles from ranch. Waco Airport is located just 40 minutes from ranch. We have a private FAA approved airstrip located on the ranch that can accommodate most all private planes. W4 Ranch airstrip's new location identifier for the landing facility is 84TE.

A 75' wide x 4,500' long asphalt runway.

Call (254) 635-4444 for shuttle to sale barn.

Sale Day Phone

(254) 635-4444 – Phone bids welcomed

Terms of Sale

Terms of sale are CASH, to be paid in full at the conclusion of the sale. We will be glad to consider special terms if arrangements are made prior to the sale date. Contact Tom Johnson.

W4 Ranch is glad to work with international buyers to meet all necessary health requirements; however, buyers will be responsible for any costs associated with completing those requirements for shipment.

When a partial interest is purchased in a bull, the buyer must insure the bull before they will be sent to stud.

Sale Conditions

Each animal will be sold to the highest bidder with the auctioneer settling any disputes as to bids. Each animal will become the property of the buyer as soon as sold.

Guarantee

All cattle are guaranteed to be breeders; all females having been examined safe in calf will be considered as proven breeders. Any bull subsequently found to be a non-breeder may be returned in good condition and with our permission within six months of the sale date. We reserve the right to try any reported non-breeder for six months and if we cannot confirm the animal as a breeder will refund the purchase price.

Herd Health

Individual health certificates for interstate shipment will be furnished on all sale cattle. All test-age cattle will have been tested negative for Brucellosis. All the cattle have been vaccinated for 7-Way Blackleg, Lepto and wormed. Mark Jackson, DVM serves as our herd veterinarian.

EPDs

EPDs in this catalog were obtained on Sept. 8, 2026.

Note

All persons attending the sale do so at their own risk. W4 Ranch nor any person connected with the sale assumes liability, legal or otherwise, for any accidents which may occur.

THE OFFERING

85 Two-Year-Old Registered Hereford Bulls

All two-year-olds

75 Registered Hereford Heifers

Bred to Low Birth Weight Hereford Bulls for Spring Calves

50 Commercial Hereford Heifers

Bred to Low Birth Weight Angus Bulls

40 Black Baldy True F1 Heifers

Bred to Low Birth Weight Angus Bulls

**Sale will be broadcast online
at [Live-Ag.com](https://www.live-ag.com)**

See page 7 for bidding information.

Schedule of Events

FRIDAY, OCTOBER 16, 2026

8:00 a.m. – Coffee, donuts and viewing of cattle

11:00 a.m. – Lunch served

12:30 p.m. – Fall Production Sale

WHY IS THE PURINA® ACCURATION® AND PURINA® WIND & RAIN® MINERAL THE RIGHT FIT FOR MY OPERATION?

One size doesn't fit all, especially in the cattle world.

That's why Purina® Accuration® and Purina® Wind & Rain® Mineral give cow/calf producers flexibility to select from high-quality nutrition options to create a whole herd nutrition program that best fits their needs. Purina® sets the foundation for success with elite, complete nutrition programs. Producers can also choose to enter additional value-added programs that are amplified by the research-based and time-tested approach of Purina Animal Nutrition®.

WORK WITH BAR NONE COUNTRY STORE TO CREATE A TAILORED PLAN TO MEET YOUR OPERATION'S GOALS.

PERFORMANCE & CARCASS – EPD INFORMATION

Calving Ease – Direct (CE)

CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age. For example, if sire A has a CE EPD of 6 and sire B has a CE EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

Birth Weight (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty. The figure in parentheses found after each EPD is an accuracy value or reliability of the EPD.

Weaning Weight (WW)

WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of 60 and sire B has a WW EPD of 40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lb. heavier at weaning when compared to sire B's calves.

Yearling Weight (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of 100 and sire B has a YW EPD of 70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lb. heavier at a year of age when compared to sire B's calves.

Scrotal Circumference (YSC)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a .7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm. In the Hereford genetic analysis, a multiple-trait model was used for scrotal circumference. Weaning weight was used as a predictor variable to increase the prediction accuracy of SC EPDs. Therefore, an animal with a weaning weight EPD should also have a SC EPD.

Maternal Milk (MM)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 MM EPD should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production during the entire lactation.

Teat Size (TEAT)

Scores range from 9 (very small) to 1 (very large, balloon shaped) and are subjective assessments of the teat length and circumference. Oversized teats are difficult for newborn calves to nurse, and the calf may not receive adequate colostrum. This could lead to a higher incidence of scours or decreased immunity levels in the newborn calf.

TEAT EPDs are reported on the scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment. For example, if sire A has a teat size EPD of 0.4, and sire B has a teat size EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score smaller teat size in daughters of sire A, compared to sire B.

Ribeye Area (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Marbling (MARB)

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF]) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Baldy Maternal Index (BMIS)

The Baldy Maternal Index is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed towards Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

Brahman Influence Index (BIIS)

The Brahman Influence Index is a maternally focused index that is based on a production system that uses Brahman x Hereford cross cows. Progeny of these cows are directed towards a commodity beef market since Certified Hereford Beef does not accept Brahman influenced cattle. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability in finishing non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep harvested progeny successful for a variety of commodity based programs. This index targets producers that use Hereford bulls on Brahman influenced cows.

Certified Hereford Beef Index (CHBS)

The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows where all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight and Marbling to ensure profit on the rail. As well there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. In addition, there is a positive weighting for Rib-eye Area and a negative weighting for Back Fat to maintain desirable Yield Grades. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

THE W4 RANCH BULL DEVELOPOMENT

Our Bull Development Center is 100 acres that is divided into five paddocks with a 200 feet tall rock hill in the center.

After preconditioning, these bulls are divided by age groups and walked to the paddocks.

On one side of the hill is their water and on the opposite side, their feed source.

The distance is a half mile each way and requires climbing the rock hill. This procedure strengthens hocks and feet as well as builds muscle.

Bulls raised in this environment will work anywhere and gain as they are working.

- ✓ Bulls weaned, vaccinated and wormed at 205 days.
- ✓ Bulls conditioned on starter ration for 21 days and then transitioned to a high roughage ration for the remainder of the feed period.
- ✓ Bulls raised on high roughage ration.
- ✓ Bulls weaning and yearling weights are adjusted.

Lot 1 is a dark red, goggle-eyed son of Sherman 2157K that combines extra width, dimension and muscle with impressive ribeye numbers and added yearling growth. His donor dam is an L1 cow from the renowned Holden family and traces to the immortal 5139R cow, a female that has made a lasting impact on the Hereford breed. This is a bull with the kind of genetic depth and performance that can make a significant contribution to a program.

W4 Ranch will retain 1/4 semen interest, collect the bull following the sale and deliver him to the buyer prior to the fall breeding season.

CHURCHILL W4 SHERMAN 2157K ET | Sire of Lot 1

GD HH MISS ADVANCE 5139R | Great Granddam of Lot 1

Lot 2 – Selling: Full interest and full possession.

Lot 2 is a horned 267K son out of 079H, the dam of Sherman 2157K, bringing some exciting and proven genetics to the offering. This long-sided bull is built with extra muscle, bone and dimension, giving him the kind of substance to add pounds and performance to his progeny. Backed by a powerful cow family, he also offers the potential to improve udder quality and maternal value while maintaining the growth and productivity needed in today's commercial and registered Hereford programs. A bull with plenty of genetic potential to move a program forward.

Lot 3 – Selling: 1/2 interest and 1/2 possession.

What a tremendous flush of bulls out of 267K and Sherman's dam! And Lot 3 is impressive. This powerful, deep-sided herd sire prospect combines impressive phenotype with a genetic profile that puts him in the top 10% of the breed for 11 traits. He is a true herd bull prospect—low birth weight, high growth and easy to look at, with the length, depth and substance to make an impact on a breeding program. The combination of calving ease and growth makes this a bull with tremendous versatility and long-term value.

Lot 5 – Selling: 3/4 interest and full possession.

This bull checks a lot of the boxes his brothers do as well. Long, deep-bodied and loaded with extra muscle, this prospect has the look and the performance to make an impact. Add a great set of EPDs and plenty of style, and he is one that deserves a close look.

Lot 4 – Selling: 3/4 interest and full possession.

Another powerful polled son out of the proven 079H flush! This bull combines tremendous depth and capacity with a powerful, well-constructed build and an impressive EPD profile. Fully pigmented and exceptionally attractive, he brings the kind of look, performance and genetic package that makes him a standout herd sire prospect.

Exciting Sherman son out of the great Haygood female 6120. This is her natural calf and a full brother to the high-selling bull from the Fall 2025 sale. A true LBW prospect with excellent teat and udder scores, he combines calving ease with the maternal strength and functionality to make lasting impact. Build a cowherd around this kind of bull!

If you are looking for a true meat wagon bull, look no further! This stout-built prospect is loaded with shape, dimension and muscle, especially through his quarter. Moderate-framed and easy to look at, he is backed by a great young cow and offers the kind of power and functionality that will add pounds and performance to his calves.

IS YOUR AGENT A LIVESTOCK SPECIALIST?

WE KNOW LIVESTOCK INSURANCE BECAUSE WE SPECIALIZE IN IT.

Our livestock insurance solutions are tailored to meet the unique needs of your operation, ensuring your are protected against unexpected events.

ANNUAL FORAGE

Protects forage plants grown for livestock feed against lack of rainfall, offering coverage that secures your feed supply through unpredictable weather conditions.

LIVESTOCK RISK PROTECTION (LRP)

Aids in managing price risk by providing coverage against market price downturns.

ANIMAL MORTALITY

Provides coverage for death, or humane destruction of a covered animal as a result of an accident, injury, illness, disease and/or disability occurring during the policy period.

PASTURE, RANGELAND, FORAGE (PRF)

A rainfall index program designed to provide coverage for losses of forage for grazing or harvested for hay.

THANK YOU

Your trust is important to us!

We hold two sales a year and have for many years.

We fully guarantee the cattle and want your W4 buying experience to be pleasant at every step and profitable for your operation. Thank you for your trust in W4 genetics.

We will hold a Fall Production Sale, follow our social media pages/website for more information.

For news about the ranch, our cattle and events we participate in throughout the year, visit
